

SecureMe - User Manual

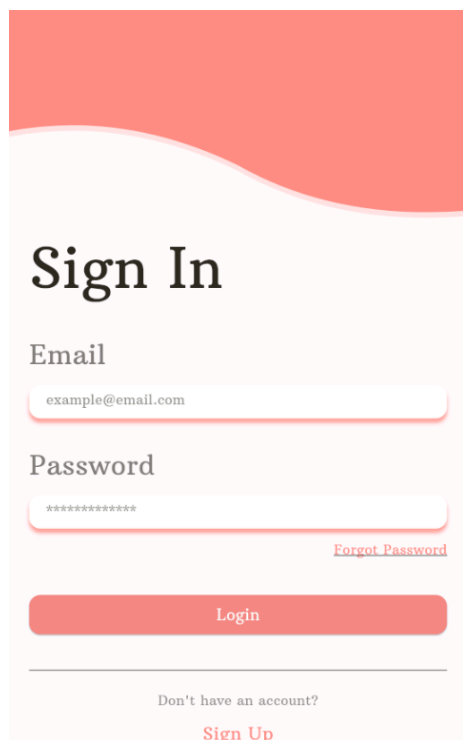

How to Use the App

Sign In

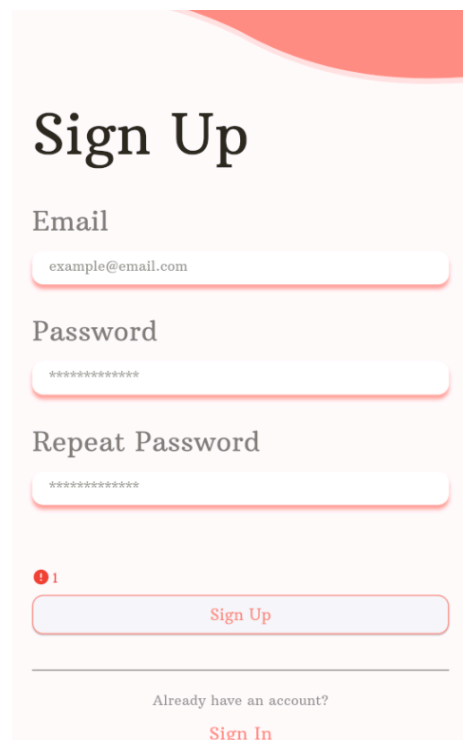

- Upon loading the app, you will be greeted with the sign in page.
- Enter your email and password and press the “login” button to proceed.

Sign Up

- New users should select the option to “signup” with a new account, shown at the bottom. This will require you enter a desired username and password (username can be changed later).
- You will then be rerouted to the sign up page like before. Enter your new login with your email and password to access the app.

The Sign In screen features a red header with a white wavy line. Below the header, the title "Sign In" is displayed in a large, bold, black font. Underneath the title are two input fields: "Email" with the placeholder text "example@email.com" and "Password" with masked characters "*****". A red "Forgot Password" link is positioned to the right of the password field. At the bottom, there is a red "Login" button and a link that says "Don't have an account? Sign Up" in red text.

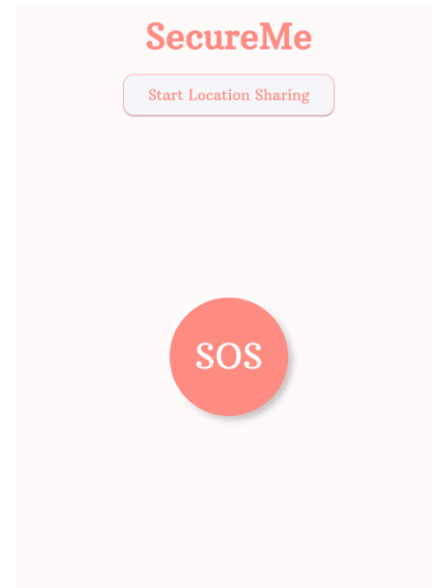

The Sign Up screen features a red header with a white wavy line. Below the header, the title "Sign Up" is displayed in a large, bold, black font. Underneath the title are three input fields: "Email" with the placeholder text "example@email.com", "Password" with masked characters "*****", and "Repeat Password" with masked characters "*****". A red "1" icon is located to the left of the "Sign Up" button. At the bottom, there is a red "Sign Up" button and a link that says "Already have an account? Sign In" in red text.

Home Screen

- This home screen will be your landing page when you log in.
- The “start sharing location” button at the top is your non-emergency tool to share your location with your contacts. You will appear on their map, with no further notification.
- The SOS button will send an alert to your emergency contact along with a preset emergency message, and begin sharing your location. This can be customised on your profile page. This will also trigger the “location sharing” to show as “ON”.
- Pressing the “location sharing” button again, which will now read “stop location sharing” while it is active, will disable location sharing.

Navigation

- From left to right: Community resources, personal contacts, home page, map, user profile

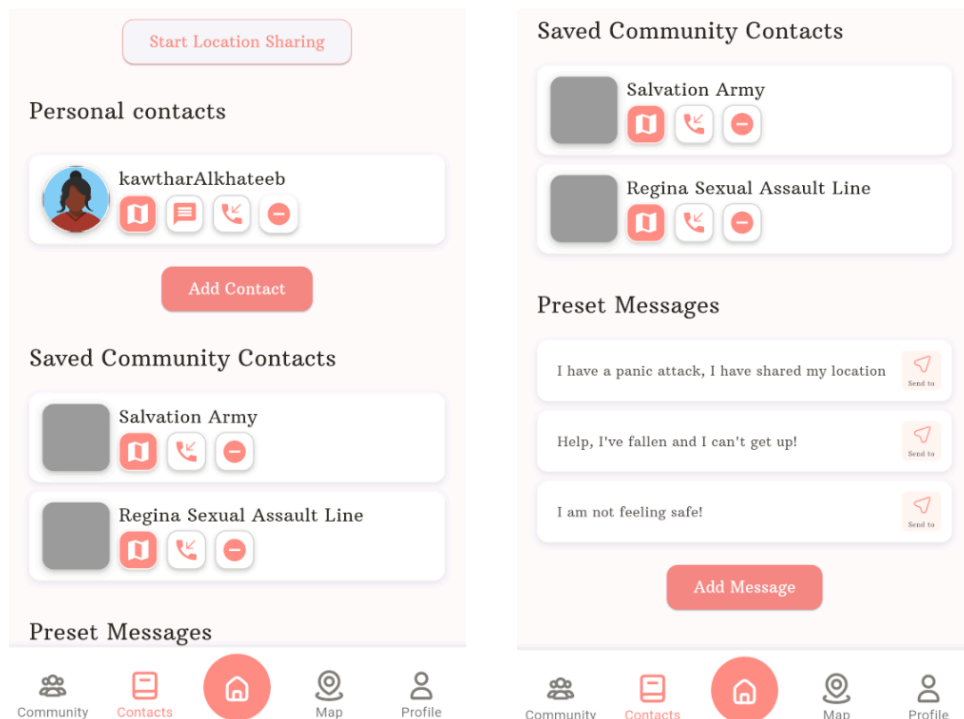

Community Resources

- Here will be a list of local resources of various types; help lines, shelters, emergency resources, etc. They are grouped by purpose for ease of use, but you may also search, if you know the name of the resource you're looking for.
- The functions associated, from left to right: add as a contact, call, view on map (only available for contacts with physical addresses).
- Choosing to call a contact will preload the phone number to your phone. You will only need to confirm by pressing “call.”

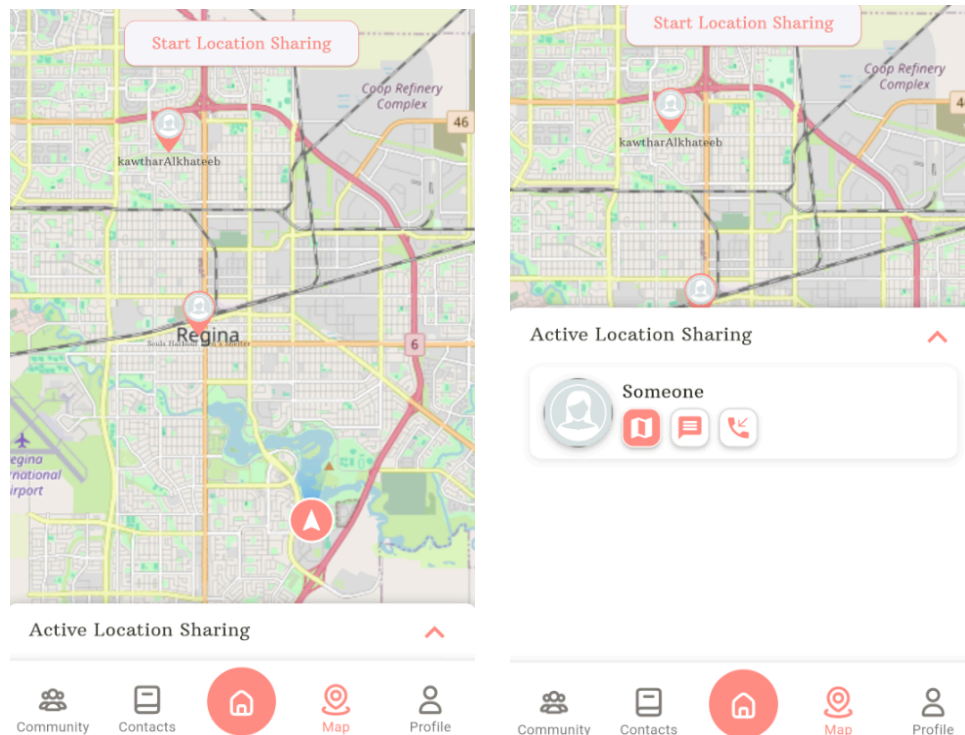

Contacts

- Here you will see your personal and community contacts.
- First it shows user contacts. Then it shows community contacts. Towards the bottom are your account's preset messages, which you can choose to send, as well as add new messages.
- Contact functions, left to right: view on map, message, call, remove contact
- Choosing to message your contact will open a chat screen where you can send text messages

Map

- Contacts should automatically show on the map as they begin sharing location. Any saved community resources will also show up, as well as any resource from the community page you have selected to show.
- Your own position is also visible. Your contacts will show their images; you will appear as an arrow.
- You may open the sliding window at the bottom called “Active Location Sharing.” This allows you to view a list of your contacts which are currently sharing their location, as a quick access to the same functions you see in your contact list.

Profile

- You may edit your profile to change your name, your profile image, view your information, and set your emergency functions.
- “Edit profile” will give you an option to change your username and email.
- Pressing the camera button will open your device’s file system to choose a photo to upload.
- You can enter a preset message by the drop down and the contact which will receive it for when you press the SOS button. You must also press the “update SOS emergency info” button to confirm.
- You may logout from this screen as well, if you wish. The app will no longer run in the background for you if you do so.
